WE OFFER

- turnkey conceptual and working design of industrial facilities
- manufacture and sale of equipment / technological / ventilation / boiler room
- production of details and accessories on request
- installation of equipment, process pipelines, electrical networks, HVAC and aspiration systems according to ISO and GMP standards
- process validation, project and equipment qualification
- service and adjustment
- ventilation of clean rooms according to gmp standards
- installation of clean rooms
- manufacture of capacitive equipment / reactors / fermenters / inoculators / CIP
- automation and scheduling of engineering systems

THE PROJECT TEAM FORMATION

From the very beginning of the project, we provide a full range of potentially successful solutions for your project through the implementation of complex and system design solutions at earlier stages.

Due to creative and detailed approach of our specialists, the most optimized technological solutions are developed in your projects. We can act both as a designer of individual sections and as a general designer or the general conductor.
